4/ Best time to visit & why. What can you see and do there (Ruzin Vyacheslav & Panukhin Vladislav) – walk, see birds and trees

Lythrum salicaria

Geranium pasulte

Paris quadrifolia

Vlad

5/ Nizhniy-park doesn't excel in a big amount of different kinds of animals which inhabit it, its fauna is very typical for an urban park. However, all the birds and little animals are greatly loved by the townsfolk. In this place, there are two kinds grass snakes — widespread in Europe non-poisonous snakes, cute little grain crop pest striped field mice as there are a lot of pines in the park, a lot of squirrels live there and feed with conifers' seeds. Different birds are common in the Nizhniy, too: there are woodpeckers, crows, crests, and several kinds of tits (by Shakhanova Nika)
